Mr. Mark Baily, Area Manager
Bureau of Land Management
Warm Springs Area
15 East 500 North
Fillmore, UT 84631

Dear Mr. Baily:

In reference to your letter of May 15th, regarding a proposed Dike across the Sevier Lake for the purpose of collecting certain chemicals contained in the lake, and the building of an access road to the sight of the construction.

According to the map, the road would be mostly on and across our entire allotment and would have some adverse affect on the grazing of our sheep. Because of the number of vehicles traveling on the road the sheep would be disturbed constantly, when they are in that area. Also, there may be some struck by vehicles and there would be some grazing lost, due to the building of the road and taking land out of production. And, when there is a disturbance of this nature, helageten is the first plant to grow.

On the other hand, there would be some benefit to us derived from the building of the road, by our using it for hauling water farther down on the flat

I appreciate the invitation to make a comment on the affect this project will have on our sheep operation.

Sincerely yours,

Henry V. Wheeler
